

Money Market Portfolio Review - Treasury Mandate

Portfolio Scope

Mandate: Optimize the treasury liquidity sleeve for Portfolio PORT_MMF_901. Current portfolio: Total investable cash balance is \$625 million. The current allocation is overweight a small number of government and prime money-market funds and should be reviewed against liquidity and concentration controls.

Investment Requirements

Control	Policy language	Optimizer field
Daily liquidity	Daily liquidity must be at least 32%.	daily_liquidity_req
Weekly liquidity	Weekly liquidity minimum 68%.	weekly_liquidity_req
Prime funds	Prime fund exposure must not exceed 35%.	max_prime_fraction
WAM	Weighted average maturity must stay under 50 days.	max_wam_days
Concentration	Single-fund exposure must not exceed 40%.	max_single_fund

Optimization goal: maximize net 7-day annualized yield while satisfying liquidity, WAM, prime exposure, and concentration requirements. Use recommendation mode only.

Governance Notes

Governance: Materiality notional is \$625 million. Estimated PnL impact is \$0. This is not a production constraint change.

Current Portfolio Observations

The desk wants a clean before/after review showing baseline yield, optimized yield, daily and weekly liquidity, WAM, prime exposure, single-fund concentration, binding constraints, and an audit-ready mapping from this PDF into optimizer inputs.
